Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel

PS-1	Emily Johnson, EV Market Strategy Director	identify the best-performing vehicle categories and manufacturers and compare battery adoption, driving range, and customer satisfaction	the relevant measures are spread across many records and are difficult to compare quickly in one view	she needs a reliable, interactive overview of market performance to guide portfolio and investment decisions	uncertain about which segments and products deserve strategic focus
PS-2	David Chen, Automotive Business Intelligence Manager	evaluate manufacturer market share, sales performance, battery technology mix, and manufacturing-country trends	he lacks a single comparative view that makes competitive and geographic patterns easy to assess	clients need evidence-based recommendations before entering or expanding in EV markets	less confident making product-positioning and market-expansion recommendations
